

## **Initial Project Planning**

| Date          | 12 June 2025   |
|---------------|--|
| Student Name  | Sanika Suresh Patil  |
| Project Name  | Uncovering The Hidden Treasures Of The<br>Mushroom Kingdom: A Classification<br>Analysis |
| Maximum Marks | 4 Marks  |

## **Product Backlog, Sprint Schedule, and Estimation (4 Marks)**

| Sprint   | Functional<br>Requirement<br>(Epic) | User<br>Story<br>Number | User Story / Task   | Story<br>Points | Priority | Sprint<br>Start<br>Date | Sprint<br>End Date<br>(Planned) |
|----------|-------------------------------------|-------------------------|---|-----------------|----------|-------------------------|---------------------------------|
| Sprint-1 | Model<br>Application                | USN-1                   | As a system, I need to apply a pre-trained Xception deep learning model to the uploaded image.                    | 3               | High     |                         |                                 |
| Sprint-1 | Application<br>Integration          | USN-2                   | As a developer, I need to integrate the Xception model with a Flask application.                                  | 3               | High     |                         |                                 |
| Sprint-2 | Image Input & Processing            | USN-3                   | As a user, I want to select an image for mushroom identification.   | 2               | High     |                         |                                 |
| Sprint-2 | Output<br>Display                   | USN-4                   | As a user, I want to see the identified mushroom species, with a confidence level, displayed clearly and quickly. | 2               | High     |                         |                                 |
| Sprint-3 | Performance<br>Optimization         | USN-5                   | As a developer, I need to optimize the application for speed and efficiency.                                      | 2               | Medium   |                         |                                 |
